OUR COVER IMAGE

Adam G. Clause earned his bachelor's degree in 2010 at the University of California, Davis. Post-graduation, he worked for several years as a technician in H. Bradley Shaffer's laboratory at UC Davis (now at UCLA), and now is a Ph.D. student advised by John C. Maerz at the University of Georgia. Adam's dissertation research centers on the spatial ecology and conservation biology of gerrhonotine anguid lizards, with a particular focus on California's *Elgaria panamintina* and the Latin American genus *Abronia*. He maintains broad interests in Neotropical herpetology, social perceptions of herpetofauna, and natural history. The cover image illustrates an adult *Bolitoglossa platydactyla*, collected from Las Porfiadas, Municipio de Soledad Atzompa, Veracruz, Mexico, at 1,350 m elevation. As currently recognized, this taxon is widely distributed across eastern Mexico from southern San Luis Potosí to western Chiapas. The individual shown was captured by a young boy under a stone at the base of a banana plant, among houses in a rural town bordering tropical scrub forest.
