## OUR COVER IMAGE

**César L. Barrio Amorós** is a Spanish anthropologist and herpetologist who has lived in the Neotropics for 22 years—16 in Venezuela and currently in Costa Rica. In Venezuela he explored the Lost World of the tepuis, an area from where many new species were discovered and described. Collectively, his work includes the descriptions of 50 new species of amphibians and reptiles from Venezuela, Colombia, Guyana, Brazil, and Peru, in addition to several ecological studies on snakes, turtles, and crocodylians. César presently leads herpetological and nature tours in Latin American countries. Pictured on the cover is an individual of *Charadrahyla altipotens* from Oaxaca Mexico (see Miscellaneous Notes section for additional information on this species).
